INSIDE STUFF

... "considered by many, the most successful Special Needs Basketball Program in the entire country"...

- * Our Program is for school-aged kids to young adults (ages 8-21) with special needs.
- * Each day, we offer several motor skill clinics (stations) so that players with little or no basketball knowledge can have a positive experience and develop hand-eye control. Those players with some or even a lot of experience will gain new skill sets.
- * The keys are fun, development, and self-confidence without pressure.
- * Attendees are placed in similar age groups for our development sessions. Our goal is for campers to develop peer trust across all ages.
